

ASW™1000

Active Subwoofer

Product Summary

- The ASW 1000 features a 120w built in amplifier with a 12-inch low-frequency long throw driver. As part of your home cinema system the ASW 1000 will truly enhance your listening pleasure, as it underpins the higher frequencies with a fast and articulate bass response.
- The ASW 1000 adds the deep bass territory to B&W's search for perfect sound reproduction. This active subwoofer is designed to reproduce the slamming, precision bass that is important to home cinema. Operating is easy with signal sensing 'auto turn on'.

Technical highlights

Flowport™: Golf ball aerodynamics theory points the way towards lower distortion reflex ports. Dimples improve the way the air flows over the surface of any object. In the case of reflex ports, they offer a significant improvement over simply flaring the port ends in reducing air flow turbulence at each end of the port; so you get less chuffing noise and less compression at high sound levels.
