

# DM70 Standard/Continental

## Stand-mount loudspeaker system

### Product Summary

- The DM70 is new thinking on acoustical distribution pattern especially within the vitally important mid-frequency region of 400Hz to 5kHz, aiming towards exploring the advantage of an approximately spherical distribution pattern.
- All units are designed and built within our factory to ensure maximum quality control and retention of the exclusive original design
- The styling and general appearance has been designed to be acceptable in the world market, resulting in the Standard and Continental versions each available in various finishes.

### Technical highlights

- A mid-frequency unit capable of handling input powers in the region of 35Watts RMS with distortion factors to the order of 0.5% or lower.
- The bass radiator is capable of truly complementing acoustical distribution and power handling without occupying an unduly large enclosure volume.

Standard

Continental

<b>Drive Units</b>	Electrostatic mid & HF unit covering all frequencies above 400Hz 305mm piston diameter bass/midrange unit	<b>Dimensions</b>	Standard: Height: 808mm Width: 815mm Depth: 382mm Continental: Height: 820mm Width: 680mm Depth: 390mm
<b>Frequency Response</b>	50Hz – 15kHz. Better than $\pm 4$ dB,	<b>Finish</b>	Standard: leak or walnut Continental: white and walnut
<b>Nominal Impedance</b>	8 ohms		
<b>Power Handling</b>	25 watts
