

DM™ 604

Floor-standing loudspeaker system

Product Summary

- The DM 604 is a free standing monitor created for exceptional performance across the whole range of listening requirements.
- It is a three way monitor with a dedicated Kevlar® mid-range driver, two Cobex bass drivers and a tunable port plug.
- The Kevlar® cone is housed within its own enclosure in the speaker cabinet and is restricted exclusively to mid-range frequencies. This prevents the cone from moving to bass frequencies, cutting down on harmonic distortion caused by unwanted cone movement.
- The bass is handled by two Cobex® cone drivers and is simply stunning. Doubling the bass drivers, dramatically improves the power handling and efficiency of the speaker and delivers far greater bass extension.

Technical highlights

Kevlar®: B&W developed and patented the method of using Kevlar® for loudspeaker cones to reduce unwanted standing waves. DuPont originally created Kevlar® for use in bulletproof vests.

Description	3 way vented-box system	Power handling	25W – 200W into 8 ohms on unclipped programme
Drive units	1 x 25mm metal dome - high frequency 1 x 180mm Kevlar® - midrange 2 x 180mm Cobex® - bass	Dimensions	Height: 996mm Width: 236mm Depth: 411mm
Frequency response	44Hz – 20kHz ± 3dB on reference axis	Finishes	Black Ash vinyl, Cherrywood vinyl Grille: Black Cloth
Sensitivity	90dB spl(2.83V 1m)		
Nominal impedance	8 ohms (minimum 3.3 ohms)
