

DM4

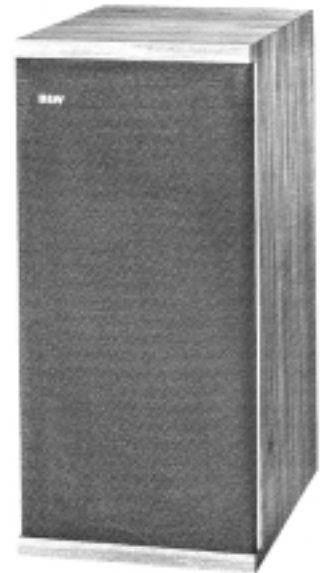

Stand-mount/Bookshelf loudspeaker system

Product Summary

- The DM4 is a three-unit monitor loudspeaker system that produces high quality results from an incredibly small cabinet, making it perfect for home or small studio where space is at a premium.
- Acoustic loading is by a very dense, critically damped enclosure with a small controlling vent to optimise the response between 60 and 120Hz. This also produces considerably reduction in cone excursion from 30 to 60Hz.

Technical highlights

- The bass/midrange units come in a critically contoured Bextrene cone configuration. This is laminated in a highly resistant damping compound that ensures linear frequency response to at least an octave above crossover.
- The upper mid frequency unit offers wide dispersion from a virtual point source and a 19mm low diaphragm mass plastic dome unit extends frequency response to above 25KHz

Drive Units	1 x 19mm voice coil 1 x 34mm mid/high frequency unit 1 x 164mm bass/midrange unit	Power Handling	10W – 30W
Frequency Response	30Hz – 25kHz. Better than ± 2 dB,	Dimensions	Height: 530mm Width: 255mm Depth: 256mm
Sensitivity	4.8 watts into nominal impedance (i.e 6.2 volts) for a sound pressure of 95dB pink noise at 1 metre	Finish	Standard: leak or walnut Special: satin white or selected veneers of rosewood or black ash
Nominal Impedance	8 ohms
