

DM™ 602

Stand-mount/Bookshelf loudspeaker system

Product Summary

- The DM 602 is twice the size of the small DM 601 and incorporates the larger 180mm, (7-inch) Kevlar® mid/bass unit. The Kevlar® cone is modelled on the cone in the Silver Signature loudspeaker - a proven design that eliminates the build-up of standing waves for a more authentic reproduction of recorded sound.
- As well as the 600 Series standard features the DM 602 also boasts flared reflex ports which dramatically increase bass efficiency and power handling. Added to this is rounded-profile zinc clamping rings which connect the drivers to the cabinet and minimise the effect of diffraction around the drive unit as sound waves travel out across the face of the speaker cabinet.
- The DM 602 is recommended for shelf or stand mounted applications and is ideally suited as front channel speakers in a Home Cinema system.

Technical highlights

Kevlar®: B&W developed and patented the method of using Kevlar® for loudspeaker cones to reduce unwanted standing waves. DuPont originally created Kevlar® for use in bulletproof vests.

Description	2 way vented-box system	Power handling	25W –120W into 8 ohms on unclipped programme
Drive units	1 x 25mm metal dome - high frequency 1 x 180mm Kevlar® cone - bass/midrange	Dimensions	Height: 490mm Width: 236mm Depth: 306mm
Frequency response	52Hz – 20kHz ± 3dB on reference axis	Finishes	Black Ash vinyl, Cherrywood vinyl Grille: Black Cloth
Sensitivity	90dB spl(2.83V 1m)		
Nominal impedance	8 ohms (minimum 4.3 ohms)
