

Release V2.04.05

Release Date:

March 2015

This firmware release is a recommended update for all users and includes the following updates -

- Product will comply with 2015 EU power regulations for networked devices. When in Sleep mode the product's power consumption will be reduced to less than 6 Watts and auto-standby will activate after 20 minutes of inactivity. (EC) No 1275/2008
- Product will prevent switching onto Wi-Fi bands that would degrade audio streaming performance. (EN300328 v1.8.1)
- Other general bug fixes to improve stability.

Please refer to Zeppelin Air manual for further information on product operation.
