Zeppelin Mini

## Small sounds beautiful

Zeppelin's™ back. But this time, it's smaller.

Zeppelin Mini is the new addition to the Zeppelin family of speakers for your iPod® or iPhone™. It gives you everything you love about Zeppelin – incredible sound, intelligent design, elegant connectivity – in a streamlined, compact package that's perfect for desktops and bedside tables.

Because even when your space is limited, it doesn't mean your sound has to be.

**Meet the family** Zeppelin Mini comes to you from the makers of Zeppelin, winner of just about every award going for its sleek design and advanced technology. With Zeppelin Mini, you're getting exactly the same attention to detail in a smaller package. Good looks and acoustic innovation run in the family.

**Digital Signal Processing** Even the greatest orchestra needs a conductor to ensure the parts are working together as they should. DSP cleverly optimises the response of the speaker's drive units, adjusting the balance depending on the signal. Music sounds wonderfully rich and detailed, no matter how loud you play it.

**High-end technology** We've spent more than 40 years advancing the science of acoustics. And we've put everything we've learned into Zeppelin Mini. Our unrivalled experience in drive unit technology plus exclusive technologies such as Flowport™ combine to deliver class-leading sound.

**Intelligent design** Whichever way you look at it, Zeppelin Mini is a sleek piece of design. But its beauty is much more than skin deep. Intelligent features include a docking arm that twists 90 degrees – perfect for watching videos or skipping through tracks in coverflow. So it's not just a pleasure to look at: it's a joy to use too.

**Space saver** Zeppelin Mini's compact size makes it the perfect speaker for smaller spaces. Use it in your kitchen, your bedroom, your office desk, anywhere you like. Much like your iPod, in fact.
