

Release: **v01.03.928**

Release Date: June 2016

This update will introduce the following improvements to Zeppelin™ Wireless, and we urge you to update your product.

- Automatically wake from sleep when a signal is detected on the AUX input (especially useful if using with a TV).
- Improvements to music control functionality when using AirPlay®, Spotify® and Bluetooth® sources.
- Mute the speaker volume during power-up.
- Reduced power consumption during sleep.
- Minor bug fixes.
